# Prison Report

---

To the Honorable State Board of Examiners, Helena, Mont.

Gentlemen:

Herewith is submitted the twenty-sixth biennial report of the Montana State Prison for the two-year period ending June 30, 1928.

Elsewhere will be found a complete financial and statistical statement covering all transactions as shown by the books and records, for the period covered by this report, to which your attention is respectfully called.

## POPULATION.

There has been an increase in population during this biennium of 35, there being a total of 427 on June 30, 1926, and on June 30, 1928, a total of 462.

## HEALTH.

Sanitary conditions here are of the very best with the result that very little sickness occurs; only three inmates died during this period.

## PAROLE LAW.

During this biennium there has been discharged on parole 461 men and women. Out of this number only 23 were returned for violation, approximately 5 per cent.

## ESCAPES.

During the past two years 18 men have escaped from the prison ranches, or trusties. None have escaped from inside the walls. These have all been returned with the exception of three who are at large. Two others who escaped several years ago have also been returned.

## EMPLOYMENT.

30 per cent of our population is employed on ranches, in office, motor vehicle department and in various work on the outside of walls. In addition, approximately twenty men are employed inside the walls in the Auto License Plate Factory, thirty in the Garment Factory, thirty in the Registrar of Motor Vehicle department, besides those that are required to keep up the work in the kitchen, bakery, laundry, barber shop, carpenter shop, shoe repairing shop, plumbing shop and vulcanizing department.

## DECREASED COST OF MAINTENANCE.

I wish to call your attention to the following figures showing the decreased cost of maintenance per man per day: 1921-1922, \$1.57; 1922-1923, \$1.40; 1923-1924, \$1.27; 1924-1925, \$1.19; 1925-1926, \$1.15; 1926-1927, \$1.08; 1927-1928, 95c, the past year being the lowest maintenance cost that I can find in the records.

## FARM.

All the butter, eggs, milk, cream, pork, poultry, veal and vegetables have been furnished the institution from the farms, produced by prison labor. Also, part of the beef. Surplus crops have been sold. The Valiton ranch of 503.5 acres and the Bratton ranch of 155.56 acres, owned by the prison, produces approximately 300 tons of hay, 100 tons of ensilage and 50,000 pounds of grain per year. Balance of our crop of hay, grain and vegetables is raised on leased land, which is very unsatisfactory. We should have additional farm land so that we could raise sufficient feed to take care of our needs and reduce our purchases to a minimum. 470 hogs were raised last year and we expect to have about 425 this year.

## AUTO LICENSE PLATE FACTORY.

The 1927 Legislative Assembly passed a bill appropriating \$25,000.00 for the installation of a License Plate Factory at the Prison. An up-to-date plant was installed and work started on 1928 plates in November, 1927. The cost of installing machinery, tools and equipment was \$12,857.95.

A total of 102,000 pairs of passenger plates, 21,450 pairs of truck plates, 511 sets of dealer's plates and 1,225 pairs of exempt plates were made for 1928 at a cost of 7½c per pair. Before the plant was installed at the prison, the cost per pair was 12½c to 15c.

Prison labor is employed in making these plates, with a civilian superintendent in charge. The State does not derive any financial benefit from the operation of this Factory, as the savings in the manufacture of the plates here is distributed to the counties.

## STATE GARMENT FACTORY.

A total of \$15,000.00 was appropriated by the 1927 Legislature for the purpose of installing a State Garment Factory at the prison. This was duly installed and work commenced in December, 1927. All the garments made are for use in the several State institutions, nothing being made for sale elsewhere.

The cost of installing the machinery, tools and equipment was \$3,169.62. The balance of the appropriation was used in buying materials to be made up into garments, and for operating expenses.

On June 30, 1928, the appropriation was overdrawn \$534.27. This was mainly caused by selling the finished articles to the institutions at too small a price. These prices have been adjusted to the point where the factory can operate at a small profit in the future.

Accounts Receivable on June 30, 1928, were \$1,465.99, materials on hand \$6,399.10, and in addition the prison owed the Factory the sum of \$2,392.00 for work done but figures for which were not available on June 30, 1928.

It is my opinion that, with the prices now in effect, the Factory will be able to operate at a profit. But even though we don't show a profit and can merely break even, it is a fine thing for the men to be employed instead of being idle and to have the opportunity to learn a trade that will be of some benefit to them when they are released from prison.

Respectfully submitted,

AUSTIN B. MIDDLETON, Warden

### REPORT OF PHYSICIAN.

Beginning with the fiscal year July 1, 1926, to June 30, 1928, 582 men were admitted. All were tested for syphilis. Of these, 71 were found to have a Positive test, or 12.1 per cent. This shows an increase of over 2½ per cent for the preceding biennium. Owing to the fact that Wasserman tests have been taken as a routine measure on admission only since June 1, 1925, no further comparison can be made.

Carried over under treatment June 30, 1926.....	13
Admitted during this biennium with Positive test for syphilis.....	71
<b>TOTAL</b> .....	<b>84</b>
These 84 cases were disposed of as follows:	
Cured .....	46
Refused treatment .....	4
Discharged with Positive Wasserman test .....	16
Died, having Tuberculosis .....	1
Physically unable to continue treatment .....	3
Under treatment June 30, 1928 .....	14
	<b>84</b>

Six men were admitted with a Positive laboratory diagnosis of Tuberculosis. Of these, two have died but as stated above one also had syphilis.

There were three deaths during this period, two of Tuberculosis (one being complicated by syphilis), and the third from a ruptured duodenal ulcer.

The total hospital cases, both medical and surgical, numbered 229. Of these 114 were surgical cases as follows:

Appendectomy .....	13
Vericocele .....	4
Herniotomy .....	25
Tonsillectomy .....	30
Circumcision .....	39
Amputated Hand .....	1
Amputated Fingers .....	2

114

Of the dental work done, 852 teeth have been extracted. No record has been kept of the number of bridges or other dental work done as this is paid by the inmate himself, and not by the State.

## REPORT OF CHAPLAIN.

The last two years have made but little, if any, change in the work of the Prison Chaplains. The needs are the same from age to age. Human frailties and human needs are always with us. Heart-aches, disappointments, tears and repentance are found wherever there are people. Every human soul needs pardon and healing. All men everywhere need a Gospel that will heal both soul and body. The Clergy of Deer Lodge have provided a religious service at the Prison every Sunday. The fundamental teachings of Christianity have been faithfully taught. These teachings are perfectly at home in the Prison, as a considerable portion of the New Testament was written in prison. The inmates of prisons have been a versatile people. Literature, Art, Music, Inventions and Learning in many fields have received valuable contributions from the busy minds of those who were shut in from the world's activities.

A majority of the inmates attend the Sunday services, although attendance is optional. Preaching in a Prison is not an easy duty. However, be it said to the credit of some of the inmates, that they have recognized the difficulty and try to lend assistance by a sympathy and responsiveness which is encouraging and commendable.

The discipline, care and management of the inmates of an institution are all reflected in the clearest light when they are assembled for worship or entertainment. And in these respects the management has the congratulation and appreciation of the Chaplains. We also appreciate the uniform courtesy and encouragement of the Warden and his employees, as their kindness and co-operation have changed a difficult task into a very satisfactory duty for the acting Chaplains.

F. C. PHELPS.

---

## THE PRISON BAND.

Organized many years ago within the prison walls from inmates anxious to learn music and play some particular band instrument.

The question of prisoners possessing ability is no longer an experiment, it is now definitely known to exist in quality and quantity. The problem is to select men who will apply themselves to methods of learning and perfect themselves at the earliest moment to qualify as a performer within the organization, and to take advantage of every available opportunity to qualify for positions when released from the institution.

During the past two years results have been far beyond expectations in this direction. From the 14 men released (with but one exception) all have qualified and are successful in their efforts.

Frequently we hear the question asked: "What good is a band in prison?"

Music is a universal language capable of producing emotions unknown to any of the other fine arts. Within the prison walls musical influences

are extremely effective and must be seen to be appreciated. This not only applies to members of the band, but to every other inmate within the entire institution.

The band at Deer Lodge is a school of training, intensive training; discipline is 100%, accuracy and loyalty almost as great, devotion and determination toward progress cannot be excelled, results are astounding and satisfactory in every department.

During the past year many improvements have been made in equipment of the band. New individual lockers have been provided to care for band uniforms and personal effects belonging to the band. Musical cabinets designed and made to care for the extensive library of music now correctly arranged in alphabetical order. New filing covers to protect the music. New index books correctly marked describing all sizes and character of music. Several new instruments including clarinets, cornets, saxaphones, trombones, basses, chimes, drums, etc., with other instruments on the way to perfect the instrumentation of the organization. There are now a sufficient number of instruments to care for 40 members. The band consists of 34 members at present with other applicants being considered to complete the number.

During the summer months Sunday afternoon concerts are played from the band stand located on the roof of one of the buildings within the prison walls, but audible to the audience from the outside, concerts beginning at two o'clock and continuing till three-thirty. Large numbers of citizens and autos conveying visitors take advantage of the opportunity and enjoy every concert during the season, while the inmates within the prison walls enjoy every number rendered by the band.

The prison band is classified, in methods of operation and standard of merit, among the best prison bands in the country. It is economically operated and strictly but generously governed. Its efforts and results of its work convey to every inmate within the institution, obedience and appreciation. This example is educational and of great value to all concerned.

SAM H. TRELOAR, Bandmaster.

## MOVEMENT OF POPULATION.

From July 1, 1926, to June 30, 1927.

In institution at beginning of fiscal year .....	427
Prisoners received regular .....	254
Prisoner received for violation of suspended sentences .....	7

Motor Cycle Dealers .....		2	1	1	1	

Up to July first, 1928 the following truck and passenger plates were issued.

Passenger .....	92,985
Trucks .....	18,256
	<u>111,241</u>

The Legislative Assembly of 1927 enacted a law, providing that a certain amount should be set aside from the Motor Vehicle Administrative fund for the purpose of establishing a license plate factory in this institution, and also for the use of the Railroad Commission in inspecting gas and oil.

The sum of \$27,853.03 has been deducted from the amounts due the various Counties in Montana for the operation of the license plate factory, and the sum of \$5,485.83 is deducted for the use of the Railroad Commission in their inspection as stated above. The average cost per plate, issued for the term of this report, is .360711 as against, .3875 at Helena. Included in this cost is approximately \$9,000 for furniture and fixtures, repairs and replacements which have been needed, in this department, which have been included in our total of expenditures and which if not applied to the cost per plate, would materially reduce this amount.

Respectfully submitted,  
AUSTIN B. MIDDLETON,  
Registrar of Motor Vehicles.
